Australian Manufactured Vault Range

![CMI Safe Co - Australia's leading Safe & Vault Manufacturer]

STANDARD

AND

SKY LIGHTWEIGHT

Established in 1946, the CMI Safe Company is the leading vault manufacturer in Australia, offering a range of pre-fabricated modular vault panels to suit any application.

The CMI Safe Company have two vault options in our range; Standard and Sky Lightweight – each designed with site engineering constraints in mind. We have decades of experience within the vault team and as such have the ability to work with clients to not only manufacture but also provide an end-to-end design and construct solution; doors manufactured to any size, multiple locking options, HVAC options and much more.

Standard
Modular Vault System

The CMI Standard pre-fabricated Modular Vault System is manufactured using precision laser cutting technology and CNC processing of the steel that forms the casing of each panel for low tolerance installations. Unique combinations of reinforcements are then welded into position and a specially formulated ultra-high strength barrier material acts as the core of the panel. The results are an extraordinarily strong and rigged vault panel and door that can be formulated to withstand any combination of attacks.

- ■ 100mm Panel – 280 kg/m²
- ■ 160mm Panel – 448 kg/m²

Sky LightWeight
Modular Vault System

The CMI Sky Pre-fabricated Modular Vault System presents an innovative solution for customers facing floor loading restrictions in buildings, particularly on floors where traditional vaults might not be suitable due to structural limitations. This system is engineered with precision, employing advanced laser cutting technology and CNC processing to create steel panels with exceptional accuracy. The construction of Sky vault panels and doors incorporates cutting-edge high-strength laminated materials, combined with a confidential binding method. This not only significantly reduces the system's weight but also greatly enhances its resistance to unauthorized access attempts. The CMI Sky Pre-fabricated Modular Vault System stands out as a secure and versatile vault solution, adaptable to diverse installation scenarios.

- ■ 100mm Panel – 140 kg/m²
- ■ 160mm Panel – 224 kg/m²

Certifications

The **CMI Standard Modular Vault System** is manufactured under license and in accordance with Mutual Safes South African Bureau of Standards Scheme (SABS) accreditation.

The **CMI SKY LightWeight Modular Vault System** has been independently tested in Australia and is certified in accoradnace with Australian & New Zealand Standards AS/NZS 3809:1998

STANDARD VAULT
- ■ 100 mm Panel = CAT3
- ■ 160mm Panel = CAT4

SKY LIGHTWEIGHT VAULT
- ■ 100mm Panel = Grade VII
- ■ 160mm Panel = Grade XI

Vault
Locking Options

SMARTLOCK DIGITAL
WORLD'S LEADING SAFE, VAULT & ATM LOCKS

dormakaba

To complement our Modular Vault Systems we also offer a range of high quality vault locking solutions from SmartLock Digital and dormakaba to ensure your assets are protected and secure. SmartLock Digital are the world's leading safe, vault and ATM lock distributors and are the sole distributor of dormakaba commercial safe locks in Australia, New Zealand and the Pacific Islands.

LA GARD 702 ComboPlus and 702 Audit
With Electronic Manipulation Defence (EMD)

The LA GARD 702 range is the perfect locking solution for commercial applications and features the unique Electronic Manipulation Defence (EMD). It has a range of functions that include dual combination, time delay and 3 level code management with up to 30 opening codes.

PAXOS
Worlds Leading Vault Lock

Paxos is the worlds leading vault lock. It meets the highest international security standards and offers users 100% redundancy, in that it is designed with two systems for every function to safe guard against lock failures which is paramount on high security vaults as failures can be extremely expensive.
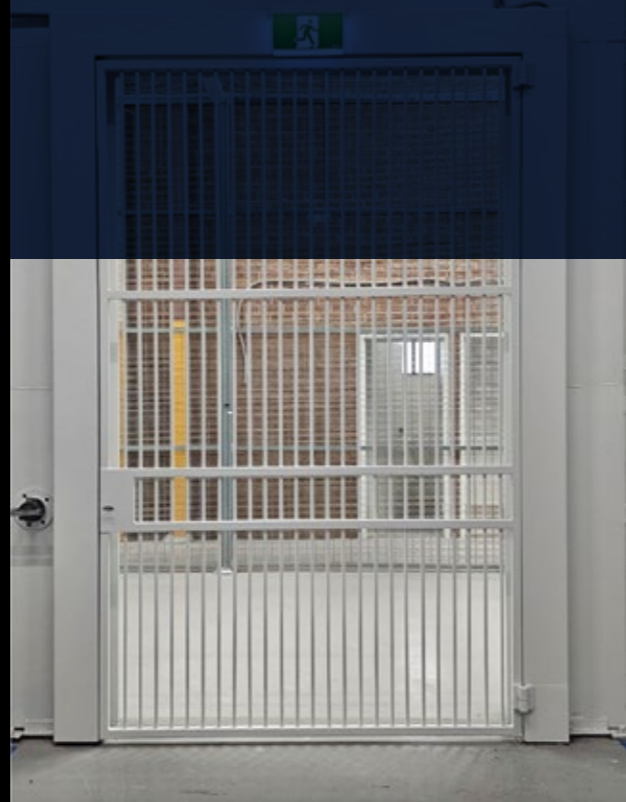

Kaba Mas X-10
With Power Star technology

The Kaba X-10 is the trusted choice for securing the Australian, New Zealand and US Government's most sensitive material. It is SCEC approved* for use on A, B and B+ containers and doors and features the propriety "Power Star" self-powered technology with an intuitive backlit display and audit trail. The X-10 provides the highest in; security, user experience and efficiency.

*Kaba Mas X-10 is approved for use on class A and B containers and doors within the CMI Safe Co range.
